

3-IN-1 DOOR SAFETY BANNER

Stop Sign, Do Not Enter Sign or Both

Model # DSB3-in-1 • Made in China

The Secure[®] 3-in-1 Door Safety Banner is another unique fall and wandering management product manufactured by Personal Safety Corporation. The Door Safety Banner was designed to eliminate the need for nursing homes and hospitals to purchase both a Stop banner and a Do Not Enter banner offered separately by other vendors. You can now reduce your costs by 50% and eliminate the need to stock two different door safety banners.

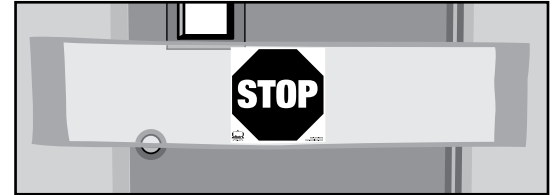

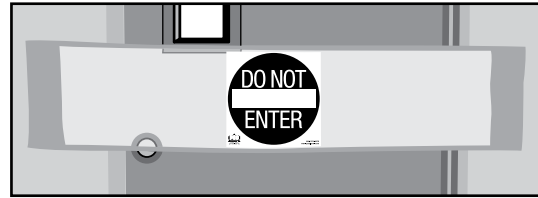

In fact, the Secure[®] 3-in-1 Door Safety Banner can be used three different ways:

- As a Stop sign only
- As a Do Not Enter sign only
- Or both a Stop Sign & Do Not Enter sign

The high impact banners will provide a strong visual cue to residents or patients that they should not exit their room when the Stop sign is facing them. In the event staff does not want other residents to enter the same room the Do Not Enter sign will deter such an entrance.

The banner can also be used with either the Stop sign or Do Not Enter sign facing the hallway of a closed door that is off limits to residents or patients.

The banner can also be used on a resident or patient's closed bathroom door in the event staff does not want the room occupant to enter the bathroom without staff assistance.

BANNER SET UP INSTRUCTIONS

1. Remove the paper backing from the adhesive strips attached at both ends of the banner.
2. Affix the strips vertically to both sides of the doors so the sign will be centered in the door opening as shown in the illustrations above.

Attach the strips to the wall so that the banner will be positioned between waist and chest level.

3. Decide which sign you want facing the hallway and simply attach both ends of the banner to the vertical strips affixed to the wall in Step 2. accordingly.

WASHING INSTRUCTIONS

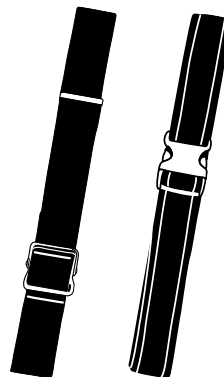

When necessary wash in lukewarm water (100 F, 38 C) and dry at low temperature. Do not use bleach.
