ALL AROUND NON-SKID PATTERN • SOFTER • LONGER

SecureSocks[™] were designed as a cost-effective complement to your fall management program. The socks provide an all around the sock non-skid pattern to assist in preventing falls with high fall risk patients/residents. Unlike competitive fall management socks, the SecureSock[™] was designed to maintain, as complete as possible, an all around non-skid pattern when placed on a patient/resident's foot. Compare the slippery gaps of competitive socks when placed on a foot with the SecureSock[™] all around non-skid pattern to see the safety difference.

SecureSocks[™] are made of ultra soft 80% cotton, 18% nylon & 2% Spandex for maximum comfort and warmth. The socks are longer than competitive socks to help prevent them from coming off a patient/resident's foot as a result of a shuffling walk.

Washing instructions:

Hand wash or machine wash on delicate cycle. Use warm water with a mild detergent. Do not use bleach. Tumble dry on low heat.

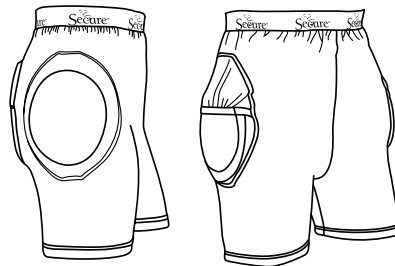

Warning!

Beware of wet floor surfaces. SecureSocks[™] were not designed to prevent falls when users are walking on wet or slippery floor surfaces.
