Dr. Rein's
Clinical Tidbits

To provide clinical support for our fall management products we are partnering with Dr. Rein Tideiksaar, a leading expert in fall management. Following is Dr. Rein's biography:

Rein Tideiksaar, PhD is president of FallPrevent, LLC and is a licensed Physician Assistant (PA). He has been active in the area of fall prevention for over twenty-five years. He has directed numerous research projects on falls and has developed fall prevention programs in the community, assisted living, home care, acute care hospital, and nursing facility settings.

Dr. Tideiksaar has written numerous articles and book chapters on falls and related topics. He is the author of *Falling in Old Age: Prevention and Management*, 2nd edition (Sprinter Publishing Company, 1997) and *Falls in Older People: Prevention & Management*, 4th edition (Health Professions Press, 2010).

Bacterial Contamination

Infections represent a common and serious problem in acute hospitals and nursing facilities. Of particular concern is the colonization and spread of microorganisms from surfaces/equipment not adequately cleaned, which can result in respiratory, urinary, skin and soft tissue, and gastrointestinal infections.

THE INDUSTRY'S BEST MONITORING PADS FEATURES

- Anti-Microbial and Non-Skin sensitive covers
- No Holes - "Incontinent Proof"
- Can be folded without damage
- Comfortable ultra thin design
- No weight restrictions
- Slip-resistant
- 5' connecting cord
- Metal connector, no plastic
- Can use bed pads with wide range of mattresses

- ✓ Our Metal Connecting Pin Will Not Break!
- ✓ Our pads can be folded without damaging pad!
- ✓ Our pads are incontinent-proof!

Dr. Rein's
Clinical Tidbits

Risk Assessment Criteria

Residents with:

- Impaired balance and cognition
- Unsteady gait and impaired mobility
- History of previous falls
- Change of condition and/or medical interactions
- New admission

Additional Risk Factors:

- Post fall
- Floor to floor transfer
- Mental status changes (Dementia, Delirium, Disruptive Behaviors)
- Continence issues

Clinical Tidbits

Moderate Risk Assessment Criteria

Residents with:

- 5 or more medications
- Impaired vision
- Wheelchair or walker dependent

Additional Risk Factors:

- Intact cognitive abilities
- No history of recent falls
- Impaired gait/balance
- One or more 'at-risk' conditions that may require bathroom, transfer and/or ambulation assistance
- Impaired 'safety judgment'
- Impaired communication (non-English speaking; aphasia; impaired hearing)

MAT-4 Set

Dr. Rein's
Clinical Tidbits

Low Risk Assessment Criteria

Residents with:

- Normal gait/balance
- Normal mobility

Additional Risk Factors that can trigger a fall:

- Dehydration
- Electrolyte imbalance
- Orthostatic hypotension
- Depression
- Diabetes (insulin dependent)
- Medication side effects associated with fall risk

Effects of Noise

Excessive noise can have physical and emotional effects on patients/residents. Effects of excessive noise include:

- Increased feelings of stress
- Irritability/behavioral outbursts
- Feelings of anxiety
- Impaired judgment
- Altered perceptions
- Difficulty concentrating
- Altered sleep patterns/insomnia

Management Strategies

Approaches for achieving effective noise reduction consist of :

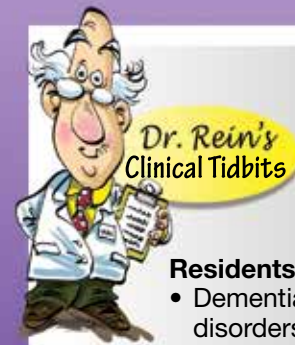

- Eliminating the cause of excessive noise, such as:
 - Limiting use of overhead public address (PA) and paging systems
 - Equipping gurneys and medication carts with quiet rubber wheels
 - Enforcing policies regarding caregiving staff talking loudly
 - Regulating the amount of noise generated by group activities
 - Utilize sound absorbing materials in walls and ceiling
- Reducing or eliminating the sound of clinical monitoring alarms whenever possible.

SECURE
120 dB Fall Management Alarm
Eliminates In-Room Alarm Sound

- Always on for resident safety
- No alarm delay switch for resident safety
- Tamper-resistant covers conceal patient alarm settings
- Flashing alert light easily identifies activated alarm
- Choice of 120, 90 or 80 dB
- Low battery indicator light & sound continues to alert until batteries are changed
- Optional Nurse Call Cable (NCI-1)
- One Year Warranty

Model No. SUA-120..... **\$23.99**

Low Stimulus Assessment Criteria

Residents with:

- Dementia and cognitive disorders
- Decreased ability to deal with multiple and competing stimuli
- Those sensitive to loud noise especially several noises at once

Low Stimulus/No-Noise Products help reduce the risk of falls and injury

PSC's line of low stimulus products are designed with the option of having the alarm sound in the patient's/resident's room or eliminate the in-room alarm sound entirely.

Patient centered Solution based Cost effective

Breaking The Fall Cycle Free CE Credits

Content Specialist: Dr. Rein

- Increase awareness of fall and injury preventive technology
- Increase awareness of 'how to best use' fall alarms
- Increase awareness of 'how to best use' injury preventive technology. (e.g., hip protectors, low beds and floor mats)

To participate in the FREE CE program go to:
www.SecureSafetySolutions.com/free_ce.htm

** Upon completion of Breaking the Fall Cycle Program, Nurses will receive one contact hour and CNAs will receive certificate of completion for one hour.*

Free Scenarios And Solutions Power Point

We are pleased to offer patient-centered interactive Power Point presentations to assist your facility in preventing costly "Never Events." Please contact us for details.

BUY WITH CONFIDENCE GUARANTEES:

- **Highest Quality**
- **30 Day Money Back Trial**
- **110% Low Price Guarantee**
- **Orders Ship In 24 Hours If Received By 2 PM CST**
